

Mobile community portal

“White label mobile community portal - ready for you, your users and your brand”

“Make your web community mobile!” -

If you operate an existing internet community portal, social network or chat and would like to allow users to access it from their mobile phones, we can make it happen.

“Get a mobile community portal – let mobile users socialize!” -

If you are a mobile operator, we can provide you with excellent mobile version of a social network for your users. A social network will bring you extra revenues from MMS and WAP.

“Photo sharing features - snap, upload and share – instantly using your mobile! “

Features >

- User photo and video profiles
- Chat and messaging
- Inbox, mail functionality and blogging
- Calendar of meetings
- Voting system
- Login / registration
- SMS invites and profile distribution
- Virtual newspapers
- Ready for various payment methods

For mobile operators >

- Works in 2G and 3G networks
- Supports all WAP and XHTML phones
- Use MMS for photo and video upload
- Follow your WAP portal guidelines
- Ready to be connected to your existing web portal using standard XML-RPC

References >

We are running mobile version of the Czech biggest web community portal www.lide.cz , which has more then 2 million registered users. Mobile version (at wap.lide.cz) is promoted by Telefonica O2 Czech republic , Vodafone and T-Mobile and is used by thousands of people every day. For most operators, billing is done by subscriptions.
